In the
United States Patent and Trademark Office

Inventor(s): Bartley M. Hirst et al.

Confirmation No.: 5138

Serial No.: 10/674,415

Examiner: Ryan M. Gleitz

Filing Date: Oct. 1, 2003

Group Art Unit: 2852

Title: Power Control System For Fusing System With External Heater

Commissioner for Patents
Washington, DC 20231

REQUEST FOR CORRECTION OF FILING RECEIPT

Attached is a copy of the official filing receipt (Exhibit A) from the PTO in the above-referenced application for which issuance of a corrected filing receipt is respectfully requested.

The correct title is "Power Control System For Fusing System With External Heater" as can be seen from the attached transmittal letter and copy of the first page of the application as filed.

Respectfully submitted,

Bartley M. Hirst, et al.

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Filing Receipt Corrections, facsimile number 703-746-9195. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

Early Publication Request: No

Title

Power control system for using system with external heater

Preliminary Class

399

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

Atty. Dkt. No. 10014356-1

POWER CONTROL SYSTEM FOR FUSING SYSTEM WITH EXTERNAL HEATER

BACKGROUND OF THE INVENTION

[0001] Reproduction apparatus, such as electrostatographic copier/duplicators, printers or the like often employ a fuser apparatus for forming an image on an image medium. One type of fuser apparatus includes a heated fuser roller and pressure roller system for fusing a developed image on a medium passing between the fuser and pressure roller. Typically, the heated fuser roller is heated using a heater internal to the roller. The pressure roller may or may not be heated.

[0002] Fusing systems using an external heater roller for heating a fuser roller are also known. For example, U.S. Patent Nos. 6,016,410, 6,289,185 and 6,304,740 all disclose a fuser roller, pressure roller and a heating roller external to and in contact with the fuser roller to apply heat to the fuser roller.

BRIEF DESCRIPTION OF THE DRAWINGS

[0003] Figure 1 is a schematic illustrating a fusing system according to an exemplary embodiment of the invention.

[0004] Figures 2A and 2B are a flow diagram illustrating a method of controlling temperature for a fusing system according to an exemplary embodiment of the invention.

[0005] Figure 3 is a circuit diagram illustrating a control circuit of a fusing system according to an exemplary embodiment of the invention.
